experience with earlier versions of

Tapestry or other web frameworks. In fact, in some ways, the less you know about web development in general, the better off you may be... that much less to unlearn! Tapestry Tutorial - Apache Tapestry - Apache Software ... Tapestry is an open-source framework for creating dynamic, robust, highly scal-able web applications in Java. Tapestry complements and builds upon the standard Java Servlet API, and so it works in any servlet container or application server. Tapestry divides a web application into a set of pages, each constructed from components. Tapestry 5 Tutorial - The Apache Software Foundation Now we can use the browser back button to return to the Start page, and click the link again. One of the nice
