BALSAM Project Final Report - Northern Dimension Institute Baltic Sea Pilot Project: Testing new concepts for integrated environmental monitoring of the Baltic Sea (BALSAM) is a project to enhance the capacity of the Baltic Sea member states to develop their marine environmental monitoring programmes. BALSAM

(October 2013 – May 2015) is one of the three Pilot Projects called "New Knowledge Projects" co-financed by the European Commission DG Environment. Baltic Marine Environment Protection Commission The Baltic Sea pilot project (BALSAM, October 2013-May 2015), with 18 partners in countries surrounding the Baltic Sea and coordinated by the HELCOM Secretariat with EU co-finance, focused on improving the coordination of environmental monitoring in the Baltic. The project aim was to enhance the capacity of the Baltic Sea Member States to develop their marine monitoring programmes. Baltic birdlife supported by international coordination ... The Baltic Sea Project improves the state of Baltic Sea by funding good ideas and inspiring

people into action At the Bank of Åland, we want to set an example to other actors around the Baltic Sea and remind people that everybody can do their share to help the situation. Baltic Sea Project Work package 6 of the BALSAM Project dealt with Baltic benthic habitat monitoring methods and programmes useful for the Marine Strategy Framework Directive (MSFD). This included both as- sessing the usefulness of monitoring methods, which are operational today, and suggesting new methods for filling the gaps for MSFD needs. Recommendations and guidelines for Benthic habitat monitoring order deep-sea pilot Denmark, Estonia, Finland, Germany, Latvia, Lithuania, Norway, Poland, Russia and Sweden are the member states of

the Baltic Pilotage Authorities Commission. Pilotage should generally be ordered at least 24 hours in advance.
