... Woodward Air-Fuel Ratio Control solutions combine electronic control systems with valve, actuation, and gas mass flow metering technology into a highly-integrated solution for industrial gas engines. The control solutions are used on many modern gas engine applications in the gas compression and power generation market. Woodward E-3 electronic air fuel ratio controls pneumatic or

Outperform When the air-fuel ratio is lower than the stoichiometric ratio, the air-fuel mixture is called rich. For example, for a gasoline engine, an AFR of 16.5:1 is lean and 13.7:1 is rich. In the table below we can see the stoichiometric air-fuel ratio for several fossil fuels.
