Workshop ISA-TR101.02-2019, HMI Usability and  
Performance, addresses the specification, design,  
implementation details, and management of an HMI  
focused on usability and performance. It explains how  
the ISA-101 standard applies in determining the

optimal solution to achieve the process goals using examples that have been shown to be effective. New ISA101 HMI report focuses on usability, performance-ISA The current co-chairs of ISA101-HMI are Dr. Maurice Wilkins and Greg Lehmann. ISA101 does much of its work via email and web meetings, but also holds face-to-face meetings. The ISA-101 Standard acknowledges the many opportunities to reduce complexity, customization, and cost in Human Machine Interface (HMI) across the plant lifecycle. HMI goes beyond just graphical design and the way information is presented to the operator. ISA-101 Standard addresses the HMI Lifecycle The ISA 101 HMI standard committee has taken great care and effort to address the design,

implementation, operation, and maintenance of HMIs for process automation systems including multiple work processes. The ISA asserts if

the person understands the what, why and how of a certain device, that person will in turn create and maintain an effective HMI. About ISA101

ISA 101.01 defines specifics of the HMI design process: an HMI philosophy, HMI style guide, and HMI toolkit. The HMI philosophy provides independent or platform-specific guiding principles for HMI design at your

plant. New White Paper for Implementing ISA101 with FactoryTalk ... The ISA101 HMI (human-machine interfaces) committee was formed to establish standards, recommended practices, and technical reports relating to HMIs in manufacturing and processing applications. The forthcoming standard and accompanying technical reports are intended to help users understand the basic concepts as a way to more readily accept the style of human-machine interface that the standard recommends. ISA101 HMI Standard Nears Completion - ISA Interchange The ISA 101 HMI standard committee has taken great care and effort to address the design, implementation, operation, and maintenance of HMIs for process automation systems
