Case management is now considered a pivotal component of long-term care service delivery and as a likely adjunct to primary care in managed health care systems (Grower, 1997; Kane, 1985). Inpatient and nursing home case-management teams may also be gaining prominence. The utility of case management is based more on Case Management, Client Risk Factors, and Service Use Today in the United States, the need for case managers is growing. While it is difficult to find precise statistics on the total number of case managers in the US, the number of CCM (Certified Case Managers) has increased over 50% to 42,000³ and, there are over 5,200 case managers who are ACM (Accredited Case Managers) certified⁴.
