Particularly Adapted to the Study of the Performance of Natural Reservoirs. Principles Oil Well Production - AbeBooks After oil well production is turned to artificial lift production during oil field waterflooding, in order to adjust the producing pressure drawdown, utilize reservoir potential, and achieve stable oil production, the daily fluid production rate should be gradually increased with the increase in water cut and flowing bottomhole pressure, thus maintaining the rational producing pressure drawdown. Oil Well Production - an overview | ScienceDirect Topics Even so, the average recovery rate is only 40%, leaving 60% of the hydrocarbons trapped in the reservoir. The best reservoirs with advanced Enhanced
