Winning The Soc Revolution Experiences Now, in 2003, facing the mid-point of that revolution, we believe that it is time to focus on winning. In this book, Winning the SoC Revolution: Experiences in Real Design, we gather the best practical experiences in how to design SoCs from the most advanced design groups, while setting the issues and techniques in the context of SoC design methodologies. As an edited volume, this book has contributions from the leading design houses who are winning in SoCs - Altera, ARM, IBM, Philips, TI ... Winning the SoC Revolution: Experiences in Real Design ... System-on-Chip Design, Embedded System Design Challenges The experience gained over the past several years has led to methodology refinements that greatly reduced time-to-market for designs of increasing complexity. The key factors to reducing SoC time to market include standard interconnects, verification methods,

the development of reusable platforms, and the enabling of concurrent software development. SOC — The IBM Microelectronics Approach | SpringerLink The winners in the system-on-chip revolution are winning because they have adopted system-level design tools and methodologies. Leading designers are using these approaches because traditional methodologies cannot deliver the orders-of-magnitude increases in design productivity required to meet modern SoC design challenges.
